Sterling's 1945 Catalog

January 25th, 1945.

Please accept this, my catalog for 1945, with my very best wishes for a fruitful and productive year. May your gardening efforts be crowned with success.

Last season was not so good, as we all know. Lack of rainfall and extreme hot weather hurt our gardens and lawns and even our shrubs and trees very seriously, and then to top it all we had to have another hurricane, and that twisted and tipped over many of the trees and shrubs that were not hurt by the dry weather.

If your lawn looks spotty this Spring, rake in a few pounds of Sterling Lawn Grass seed and top dress with a bag or more of Vigoro, depending on the size of your lawn. Apply just before a rain, if possible. Try some Zotox in late Summer if Crab Grass comes in bad, and some new Grub Formula if you think there are Jap Beetle grubs in your lawn.

A good feeding of Agrico for your trees and shrubs would help them come back to their former vigor and beauty. We have Peat Moss for your Rhododendrons and Azaleas this Spring.

Strawberry plants are on the short side this Spring, as well as Raspberry Plants, Fruit Trees and several kinds of seeds. Blue Ribbon Brussels Sprout seed was a very light crop and we are sorry to say that we have none to offer.

We have a good supply of about all other kinds of seeds, onion sets, lima beans, peas, asparagus roots and nearly all kinds of fruit trees, but advise you to order early.

Please do not ask too much of us though this Spring as we are short of help and our farming activities are necessarily increasing each year.

Thanking you for the business you have given us in years gone by and with very best wishes for a Victorious year for all of us and our Boys, I remain,

Yours truly,

RALPH W. STERLING.

DIRECTIONS

By carefully reading and observing the following directions, mistakes will be largely avoided, and your order can be filled more promptly.

Please use the enclosed Order Sheet and self-addressed envelope if possible. If you need more, let me know and I will be glad to send more to you.

Write your name, address and shipping directions plainly.

Always send the cash with your order, unless otherwise agreed upon. Money may be sent by P. O. Money Order, Bank Draft or Registered Letter. Stamps may be sent for amounts under \$1.00, but be sure to put in three-cent stamps, wrapped in waxed paper.

We pay the postage on all seeds sold by the pkt., oz. and $\frac{1}{4}$ lb. Quantities over that are priced net, to be shipped by Parcel Post, freight or express, at purchaser's expense, unless otherwise stated.

If you desire your seed sent by Parcel Post, add 8c for the first lb. and 1c for each additional lb. of your order, allowing 2 lbs. extra for package. For amount of postage on plants see Plant Department. These rates are for anywhere on Long Island.

By pricing my seeds net, postage extra, you get your seeds delivered for less money than if I quoted a Postpaid price as the 8c per lb. extra would have to be counted in and added to each single lb. priced.

$\frac{1}{2}$ lbs. will be sold at lb. rates; $\frac{1}{2}$ bu. at bushel rates.

No charge is made for packing or packages.

NOTE—In all orders received before April 1st we include trial packets of different kinds of seed, the number of packets depending upon the size of your order. If you find any of these of particular value we would be pleased to hear of it.

If you cannot use this catalog or receive more than one, will you kindly pass it on to someone interested? Thank you.

NOTICE—I do not warrant in any way, express or implied, the description, quality, productiveness or any other matter pertaining to any seeds, bulbs, plants, shrubs or trees sold by me, and I will not be in any way responsible for the crop.

However, all complaints are carefully looked into and I try to adjust them satisfactorily to all.

Southold, L. I., Oct. 20th, 1944—I am very much pleased with the Mountain Ash that your men set out for me. With best wishes. K. T. S.

Mattituck, L. I., Sept. 30th, 1944—I grew some Nancy Hall Yams from your plants this year. They were wet down thoroughly three times. In digging them this Fall I found one potato weighing 5¾ lbs. and one hill (see photo) weighing 10¼ lbs. They are of a nice yellow color and fine when baked. J. C. B.

Southold, L. I., Nov. 15th, 1944—I want to say that you have the best gang of workmen we ever had on the place. I wish to compliment you on their work in moving our boxwood. H. A.

GRASS, CLOVER AND ALFALFA SEED

Prices liable to change without notice.

Terms strictly cash.

I make my prices just as reasonable as is possible consistent with the quality. It is the very last fraction of 1% in purity that costs money. I believe that it pays big returns, too, as it is truer in seeds than in anything else that "the best is none too good."

In sowing Timothy alone without Clover, use 15 to 20 lbs. to the acre. If your land is sour and Grass and Clover does not do well as a rule, a little lime sown on top of the ground and harrowed in before sowing the seed would be a great help.

All our Clover Seeds grown in the Northwest U. S. A.

A Nice Lawn Grown from Sterling Lawn Grass Seed.

LAWN MAKING

Our Lawn Grass Seed is mixed from the very best grass seed, recleaned and free from weeds, and we sell many hundred pounds all over Long Island, as there is no better grade seed on the market.

Loosen the soil in which a new lawn is to be made to a depth of at least five inches, and lighten it with humus, compost or manure, if it is heavy and inclined to bake. Apply fertilizer liberally, either Sheep Manure, Bone Meal or Bovung, especially good for lawns. Use Vigoro on established lawns in early Spring and early Fall.

Sow in the early Spring when cool weather and ample rainfall will insure complete germination and a good start for the seedlings before hot dry weather comes. If seeding must be delayed, special precautions must be taken to prevent the ground drying out. Early fall is a very desirable time to seed, if moisture is sufficient.

See that the seed is well covered. Rake it into a new seed bed and roll so that the soil is firmed over the seed. Where seed is sown on an old lawn, always cover it with a top dressing of sand or soil and fertilizer. Seed thrown on the top of hard ground has no chance to grow and will merely wash off.

Mattituck, N. Y., Sept. 30, 1943—From 250 Break O'Day tomato plants I had from you I picked 5 bu. at once and in 2 days I picked as many more. The size and quality was excellent. The cheapest we sold No. 1 for was 10c per lb., 3 lbs. for 25c. No. 2 tomatoes sold readily at 75c per basket. The Rutgers Globe were fine but aphids injured them, so they did not do as well as the Break O'Day. All my garden was very satisfactory. Nantes and Perfection Carrot and World Record Peas in particular. J. B.

Utica, N. Y., 1943—I had a wonderful garden this season. I am leaving the kind of seed to plant to your judgment. Wax and Green Beans yielded heavy. We had enough canned vegetables from our garden last year to last till we start again this year. B. C. G.

Cutchogue, N. Y., Jan. 26, 1944—The Big Stem Jersey Sweet Potato Plants I bought of you last year were the best quality I ever raised. They were not so large on account of the dry weather, but the quality was there. F. G.

May I substitute if out of any kinds ordered?

Maybe tomorrow the bells will ring
The whistles blow and the children sing
That peace has come back to earth again
And sanity has returned to men.

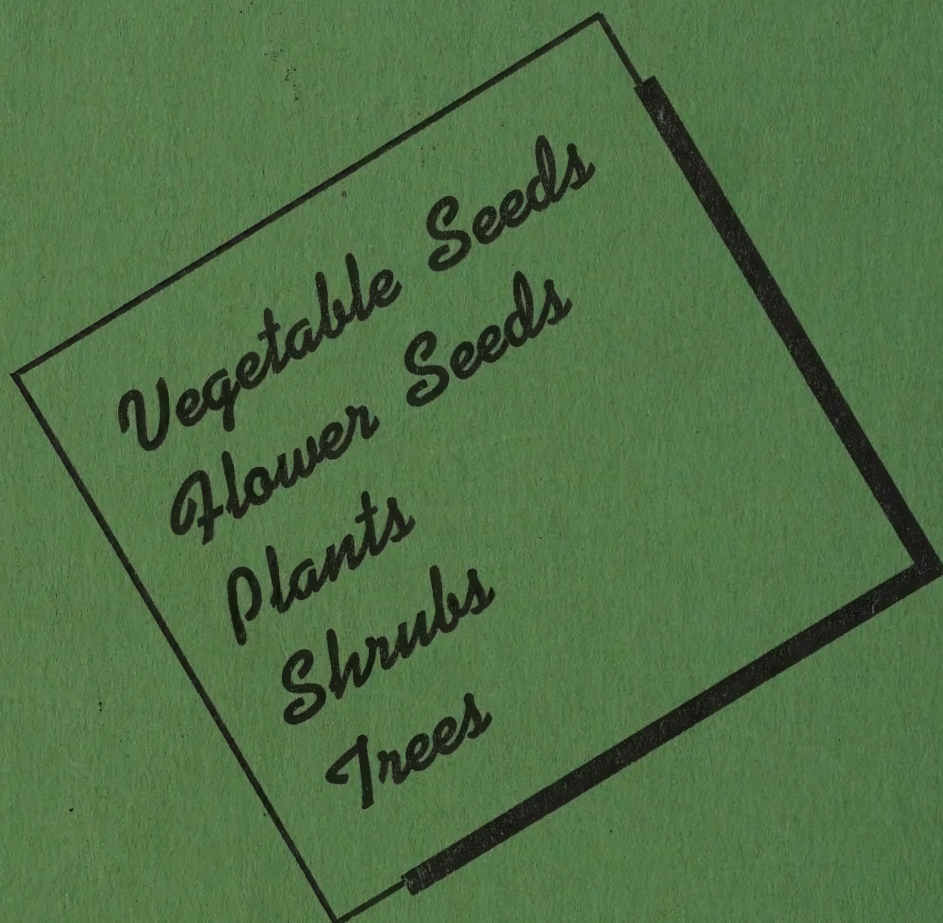

Maybe tomorrow the sun will rise
On a peaceful earth, because of peaceful skies—
Blue skies — whose billowing clouds contain —
Not roaring, screaming death — but rain.

Maybe tomorrow the rain will fall
On brown, scorched lands, and disperse the pall
Of strife and hate that lingers there
On once-green fields that no longer bear.

Maybe tomorrow when guns are stilled
And destruction's done — we'll start to build
The homes we've saved and waited for
And start to really live once more.
